

FPT.120

Proximity Sensor

Your Force Multiplier for Operational Excellence

Mechanics of the sensor gives sufficient space for integration of IR seekers.

PRF Ar-Ge Müh.San. ve Tic. A.Ş.

Key Features:

- **Adjustable Burst Height:** Electronically programmable from 2m to 12m with 1m resolution
- **Accuracy:** Better than ± 2 m
- **Very High Precision**
- **Cockpit-Controlled Interface:** RS-485 communication
- **Lightweight**
- **Advanced ECCM Capabilities:** Protection against jamming via proprietary algorithms

Operational Support:

- Integrated with PROTES (Hardware in the Loop (HWIL) Test System) for real-time performance verification
- Enables full electronic testing during pre-load, pre-delivery, and in-storage phases
- On-site serviceability and shelf-life assessment via PROTES

Applications:

- Ideal for modern precision-strike operations where height-triggered detonation and resistance to electronic warfare threats are critical for mission success.

Achieve precise impact and superior mission success with FPT.120
